

IAM Virial Partition: Transition Zone Signatures

Dark Matter (geometric $\frac{1}{2}$) $\leftrightarrow$ Dark Energy (kinetic $\frac{1}{2}$) of the Virial Equilibrium

Virial Partition – Key Numbers	
Today ($z=0$):	
$\Omega_m/[\beta_m \cdot E(1)] = 2.0000$	(= 2 exactly)
This IS the virial theorem: $ V /K=2$	
Transition zone ($z=0.3\text{--}0.7$):	
Info pressure:	10--17% of total DE
Virial ratio:	6 $\rightarrow$ 20
Ω_m discrepancy:	3--8%
Matter--DE equality (IAM):	
$z_{\text{eq}} = 0.361$	(Λ CDM: $z_{\text{eq}} = 0.295$)
Deceleration transition:	
Λ CDM: $z_t = 0.632$	
IAM: $z_t = 0.718$	
Farooq \& Ratra (2013):	0.74 ± 0.05
Jesus et al. (2020):	0.698 ± 0.07
